

APPENDIX L  
EVALUATION ITEMS

L-1. Units in plant:

- (a) Total number
- (b) Number of units with similar windings

L-2. Operating conditions:

- (a) Overload
- (b) Temperature
- (c) Peaking, base loaded, condensing, or other
- (d) Starts per month (other cycling modes)
- (e) Age
- (f) Hours of operation

L-3. Winding conditions:

- (a) Visual inspection results
- (b) Stator electrical tests (significant tests supporting the recommended course of action)

L-4. History:

- (a) Non-routine maintenance performed
- (b) Failures and resolution

L-5. Experience with similar windings

L-6. Confidence in original installation

L-7. Economic justification: (See Appendix C)

L-8. Letter of Support and/or Marketability for PMA

L-9. Potential Environmental Issues
